

I. RESPONSIBILITIES

This plan applies to all employees of _____, and [all]/[the following work sites]:

This plan requires commitment to ensure compliance with all plan elements aimed at preventing the spread of infectious disease. The following supervisory employee(s) are designated to enforce compliance with the plan. Additionally, these supervisory employees will act as the designated contacts unless otherwise noted in this plan:

Name	Title	Location	Phone

II. EXPOSURE CONTROLS DURING A DESIGNATED OUTBREAK

A. MINIMUM CONTROLS DURING AN OUTBREAK

During an airborne infectious disease outbreak, the following minimum controls will be used in all areas of the worksite:

1. General Awareness: Individuals may not be aware that they have the infectious disease and can spread it to others. Employees should remember to:
 - Maintain physical distancing;
 - Exercise coughing/sneezing etiquette;
 - Wear face coverings, gloves, and personal protective equipment (PPE), as appropriate;
 - Individuals limit what they touch;
 - Stop social etiquette behaviors such as hugging and hand shaking, and
 - Wash hands properly and often.
2. "Stay at Home Policy": If an employee develops symptoms of the infectious disease, the employee should not be in the workplace. The employee should inform the designated contact and follow New York State Department of Health (NYSDOH) and Centers for Disease Control and Prevention (CDC) guidance regarding obtaining medical care and isolating.
3. Health Screening: Employees will be screened for symptoms of the infectious disease at the beginning of their shift. Employees are to self-monitor throughout their shift and report any new or emerging signs or symptoms of the infectious disease to the designated contact. An employee showing signs or symptoms of the infectious disease should be removed from the workplace and should contact a healthcare professional for instructions. The health screening elements will follow guidance from NYSDOH and CDC guidance, if available.

4. Face Coverings: To protect your coworkers, employees will wear face coverings throughout the workday to the greatest extent possible. Face coverings and physical distancing should be used together whenever possible. The face covering must cover the nose and mouth, and fit snugly, but comfortably, against the face. The face covering itself must not create a hazard, e.g. have features that could get caught in machinery or cause severe fogging of eyewear. The face coverings must be kept clean and sanitary and changed when soiled, contaminated, or damaged.
5. Physical Distancing: Physical distancing will be followed as much as feasible. Avoid unnecessary gatherings and maintain a distance of at least six feet (or as recommended by the NYSDOH/CDC for the infectious agent) from each other. Use a face covering when physical distance cannot be maintained.

In situations where prolonged close contact with other individuals is likely, use the following control methods: (Note to employer: Check off the controls you intend to use and add any additional controls not listed here.)

- restricting or limiting customer or visitor entry; ✓
- limiting occupancy; ✓
- allowing only one person at a time inside small enclosed spaces with poor ventilation; ✓
- reconfiguring work spaces; ✓
- physical barriers; ✓
- signage;
- floor markings;
- telecommuting;
- remote meetings;
- preventing gatherings;
- restricting travel;
- creating new work shifts and/or staggering work hours;
- adjusting break times and lunch periods;
- delivering services remotely or through curbside pickup;
- _____
- _____
- _____

6. Hand Hygiene: To prevent the spread of infection, employees should wash hands with soap and water for at least 20 seconds or use a hand sanitizer with at least 60% alcohol to clean hands BEFORE and AFTER:
 - Touching your eyes, nose, or mouth;
 - Touching your mask

B. ADVANCED CONTROLS DURING AN OUTBREAK

Subject to changes based on operations and circumstances surrounding the infectious disease, the following specific administrative controls are anticipated to be used:

[Redacted]

[Redacted]

[Redacted]

III. HOUSEKEEPING DURING A DESIGNATED OUTBREAK

A. Disinfection Methods and Schedules

Objects that are touched repeatedly by multiple individuals, such as door handles, light switches, control buttons/levers, dials, levers, water faucet handles, computers, phones, or handrails must be cleaned frequently with an appropriate disinfectant. Surfaces that are handled less often, or by fewer individuals, may require less frequent disinfection.

The disinfection methods and schedules selected are based on specific workplace conditions.

The New York State Department of Environmental Conservation (NYSDEC) and the Environmental Protection Agency (EPA) have compiled lists of approved disinfectants that are effective against many infectious agents (see dec.ny.gov and epa.gov/pesticide-registration/selected-epa-registered-disinfectants). Select disinfectants based on NYSDOH and CDC guidance and follow manufacturer guidance for methods, dilution, use, and contact time.

B. Adjustments to Normal Housekeeping Procedures

Normal housekeeping duties and schedules should continue to be followed during an infectious disease outbreak, to the extent practicable and appropriate consistent with NYSDOH and/or CDC guidance in effect at the time. However, routine procedures may need to be adjusted and additional cleaning and disinfecting may be required.

Housekeeping staff may be at increased risk because they may be cleaning many potentially contaminated surfaces. Some housekeeping activities, like dry sweeping, vacuuming, and dusting, can resuspend into the air particles that are contaminated with the infoui.8 o.8 (p)9.6 (i-1 (in)-odng)-6.5 (dF(in)1)]TJ 0.005633 (ac)3.-7.6 3 (

B. When this plan is activated, all personnel will receive training which will cover all elements of this plan and the following topics:

1. The infectious agent and the disease(s) it causes;
2. The signs and symptoms of the disease;
3. How the disease can be spread;
4. An explanation of this Exposure Prevention Plan;
5. The activities and locations at our worksite that may involve exposure to the infectious agent;
6. The use and limitations of exposure controls
7. A review of the standard, including employee rights provided under Labor Law, Section 218-B.

C. The training will be

1. Provided at no cost to employees and take place during working hours. If training during normal work hours is not possible, employees will be compensated for the training time (with pay or time off);
2. Appropriate in content and vocabulary to your educational level, literacy, and preferred language; and
3. Verbally provided in person or through telephonic, electronic, or other means.

VI. PLAN EVALUATIONS DURING A DESIGNATED OUTBREAK

The employer will review and revise the plan periodically.

VII. RETALIATION PROTECTIONS AND REPORTING OF ANY VIOLATIONS

No employer, or his or her agent, or person, acting as or on behalf of a hiring entity, or the officer or agent of any entity, business, corporation, partnership, or limited liability company, shall discriminate, threaten, retaliate against, or take adverse action against any employee for exercising their rights under this plan, including reporting conduct the employee reasonably believes in good faith violates the plan or airborne infectious disease concerns to their employer, grm2.2 (o3l)7.1 (e)-328-3.8 (a5.6 (e)-3.)-3.8 (r72(NG)2)-3.8 (2)6o theie
